

# ZENERA LABS

## 1st Anniversary Pricing & Project Cost Guide

■ One year of building. One special offer for you.

| ANNIVERSARY SPECIAL         |
|-----------------------------|
| Business Websites — ■2,999+ |
| Student Projects — ■1,999+  |
| Mini Projects — ■999+       |

**Important:** All prices shown as “starting at” are indicative. Final pricing depends on scope, features, integrations, complexity, content, revisions, hosting and third-party services.

### ■ Websites

| Service / Package | Starting Price | Best For / Notes                                                                        |
|-------------------|----------------|-----------------------------------------------------------------------------------------|
| Launch            | ■2,999*        | 1-page responsive website; ideal for shops, freelancers, creators and local businesses. |
| Business          | ■5,999*        | Up to 5 pages; business presence, forms, WhatsApp, Maps, basic SEO and deployment.      |
| Professional      | ■11,999*       | Up to 10 pages; premium UI, animations, advanced forms, analytics and optimization.     |
| E-Commerce        | ■19,999+       | Online stores and product/catalog systems.                                              |
| Custom Web App    | ■29,999+       | Dashboards, portals, SaaS products and custom platforms.                                |

\*Anniversary pricing. Normal pricing can be restored after the anniversary campaign.

### ■ Mobile Applications

| Service / Package      | Starting Price | Best For / Notes                                   |
|------------------------|----------------|----------------------------------------------------|
| Prototype / UI App     | ■9,999+        | UI-focused prototype or demonstration app.         |
| Basic Flutter App      | ■24,999+       | Small functional mobile application.               |
| Business MVP           | ■49,999+       | Business-focused MVP with core functionality.      |
| Full-Stack App         | ■79,999+       | Mobile app with backend, database and APIs.        |
| Advanced / Marketplace | ■1,49,999+     | Complex apps, marketplaces and multi-role systems. |

## ■ AI & ML Solutions

| Service / Package        | Starting Price | Best For / Notes                                                                 |
|--------------------------|----------------|----------------------------------------------------------------------------------|
| AI Chatbot               | ■7,999+        | Conversational assistant; integrations and advanced workflows quoted separately. |
| AI Document / PDF System | ■9,999+        | Document processing, extraction and intelligent search.                          |
| Computer Vision System   | ■14,999+       | Detection, classification, tracking and related CV systems.                      |
| Predictive ML System     | ■14,999+       | Forecasting, classification, recommendation and analytics.                       |
| AI Automation            | ■9,999+        | Workflow automation using AI and APIs.                                           |
| RAG / Knowledge Base     | ■19,999+       | Custom knowledge retrieval and enterprise-style assistants.                      |
| AI Agent / Multi-Agent   | ■24,999+       | Agentic workflows and multi-step autonomous systems.                             |
| Custom AI Solution       | ■29,999+       | Bespoke AI products and complex implementations.                                 |

## ■ Student Projects

| Service / Package         | Starting Price | Best For / Notes                                                           |
|---------------------------|----------------|----------------------------------------------------------------------------|
| Mini Project              | ■999+          | Simple Python, web or ML project with source code and basic documentation. |
| Basic Project             | ■1,499+        | Moderate project with improved functionality and documentation.            |
| AI / ML Project           | ■1,999+        | Machine-learning project with implementation and explanation.              |
| Computer Vision           | ■2,499+        | Vision-based classification/detection projects.                            |
| Flutter Project           | ■2,999+        | Mobile application project.                                                |
| Full-Stack Project        | ■3,499+        | Frontend, backend and database-based project.                              |
| Major / Final-Year        | ■4,999+        | Larger project with broader functionality and documentation.               |
| Advanced AI / GenAI       | ■6,999+        | Generative AI, RAG, agents or advanced AI implementations.                 |
| Research + Implementation | ■7,999+        | Research-oriented implementation and technical support.                    |

**Academic integrity note:** Student services are positioned as development support, mentoring, documentation, explanation and implementation assistance. Students remain responsible for their own academic submissions and institution requirements.

## ■ Mini Projects

| Service / Package | Starting Price | Best For / Notes                                                                                                                         |
|-------------------|----------------|------------------------------------------------------------------------------------------------------------------------------------------|
| Mini Project      | ■999+          | Simple Python/web/ML project, working source code, basic documentation, setup instructions and one revision. Typical delivery: 1–3 days. |
| Mini Project Plus | ■1,999+        | More complex logic, database/API integration, better UI, documentation, presentation support and walkthrough.                            |

## ■ Business Automation

| Service / Package   | Starting Price | Best For / Notes                            |
|---------------------|----------------|---------------------------------------------|
| Workflow Automation | ■7,999+        | Automate repetitive business workflows.     |
| WhatsApp Automation | ■9,999+        | Business messaging and workflow automation. |
| AI Customer Support | ■14,999+       | AI-assisted customer service systems.       |
| Lead Automation     | ■14,999+       | Lead capture, qualification and routing.    |

| Service / Package        | Starting Price | Best For / Notes                              |
|--------------------------|----------------|-----------------------------------------------|
| CRM Automation           | ■19,999+       | Custom CRM workflows and integrations.        |
| AI Business Assistant    | ■19,999+       | AI assistant for internal business workflows. |
| Custom Automation System | ■29,999+       | Complex business automation and integrations. |

## ■ Design & Engineering

| Service / Package   | Starting Price | Best For / Notes                          |
|---------------------|----------------|-------------------------------------------|
| Graphic Design      | ■499+          | Basic graphics and marketing assets.      |
| Presentation Design | ■999+          | Professional presentation design.         |
| UI/UX Design        | ■2,999+        | Web or mobile interface design.           |
| AutoCAD 2D Drawing  | ■999+          | Basic 2D drafting work.                   |
| Engineering Drawing | ■1,499+        | Engineering drawing and drafting support. |
| Custom CAD Work     | ■2,999+        | More complex/custom CAD requirements.     |

## ■ How the Quote Page Should Work

1. Client chooses a project type → 2. answers a few scope questions → 3. calculator returns an estimated range → 4. client requests an exact quote.

**Recommended estimator output:** “Estimated project range: ■8,000–■15,000” followed by the key assumptions. Always label this as an estimate, not a final quotation.
