

ZENERA LABS

Updated Pricing + Website Update Guide

1st Anniversary Campaign • Internal Team Document • August 2026

OUR PRICING PHILOSOPHY

Fair pricing. Real engineering. No unnecessary upselling.

Prices shown publicly are starting prices, not promises of unlimited scope. The goal is to recommend what the client actually needs and then provide an exact quote after requirements are understood.

■ Anniversary Pricing — Public Hero Offers

Keep these three offers prominent on the website. They are the campaign hook, not the permanent definition of Zenera.

Service	Starting	Scope / Positioning
Business Website — Launch	■2,999+	1-page responsive site. Best for local businesses, freelancers, creators and simple launches.
Student Project	■1,999+	Entry-level development/support package. Final scope depends on project complexity.
Mini Project	■999+	Simple Python/web/ML project. Working code, basic documentation and setup guidance.

Recommended badge: ■ Zenera Turns 1 — Anniversary Starting Price

■ Websites

Service	Starting	Scope / Positioning
Launch	■2,999*	1 page; responsive UI; WhatsApp/contact; basic SEO; deployment; 1 revision.
Business	■5,999*	Up to 5 pages; custom UI; forms; WhatsApp; Maps; basic SEO; deployment; 2 revisions.
Professional	■11,999*	Up to 10 pages; premium UI; animations; advanced forms; analytics; performance work; 3 revisions.
E-Commerce	■19,999+	Online store, product/catalog and checkout-related functionality.
Custom Web App	■29,999+	Dashboards, portals, SaaS-style products and custom platforms.

*Anniversary campaign pricing. Mark as “starting at”; do not imply unlimited features.

■ Mobile Apps

Service	Starting	Scope / Positioning
Prototype / UI App	■9,999+	UI/demo-focused mobile prototype.
Basic Flutter App	■24,999+	Small functional application.
Business MVP	■49,999+	Core business workflow with backend where required.
Full-Stack App	■79,999+	App + backend + database + APIs.
Advanced / Marketplace	■1,49,999+	Complex multi-role or marketplace systems.

■ AI & ML

Service	Starting	Scope / Positioning
AI Chatbot	■7,999+	Conversational assistant; integrations quoted separately.
AI Document / PDF System	■9,999+	Extraction, classification, search or document workflows.
Computer Vision System	■14,999+	Detection, classification, tracking and related CV systems.
Predictive ML System	■14,999+	Forecasting, classification, recommendation and analytics.
AI Automation	■9,999+	AI-assisted business workflow automation.
RAG / Knowledge Base	■19,999+	Custom retrieval/knowledge assistant.
AI Agent / Multi-Agent	■24,999+	Agentic workflows and multi-step automation.
Custom AI Solution	■29,999+	Bespoke AI product or complex implementation.

■ Student Projects

Service	Starting	Scope / Positioning
Mini Project	■999+	Simple Python/web/ML implementation.
Basic Project	■1,499+	Moderate project with improved functionality.
AI / ML Project	■1,999+	ML implementation + explanation/documentation.
Computer Vision	■2,499+	Classification/detection/vision projects.
Flutter Project	■2,999+	Mobile application project.
Full-Stack Project	■3,499+	Frontend + backend + database.
Major / Final-Year	■4,999+	Larger project with broader functionality.
Advanced AI / GenAI	■6,999+	GenAI, RAG, agents or advanced AI.
Research + Implementation	■7,999+	Research-oriented implementation and technical support.

Academic integrity: Position these services as development support, mentoring, documentation, explanation and implementation assistance. Do not advertise cheating or submission impersonation.

■ Business Automation

Service	Starting	Scope / Positioning
Workflow Automation	■7,999+	Automate repetitive workflows.
WhatsApp Automation	■9,999+	Business messaging and workflow automation.
AI Customer Support	■14,999+	AI-assisted support systems.
Lead Automation	■14,999+	Lead capture, qualification and routing.
CRM Automation	■19,999+	Custom CRM workflows and integrations.
AI Business Assistant	■19,999+	Internal AI assistant and workflows.
Custom Automation System	■29,999+	Complex automation and integrations.

■ Design & Engineering

Service	Starting	Scope / Positioning
Graphic Design	■499+	Basic graphics and marketing assets.
Presentation Design	■999+	Professional presentation design.
UI/UX Design	■2,999+	Web/mobile interface design.
AutoCAD 2D Drawing	■999+	Basic 2D drafting.
Engineering Drawing	■1,499+	Engineering drawing/drafting support.

Service	Starting	Scope / Positioning
Custom CAD Work	■2,999+	Complex/custom CAD requirements.

■ Website Implementation Instructions

- 1. Create a dedicated /pricing or /quote page.** Keep the page focused on estimating project cost rather than looking like a generic service catalogue.
- 2. Hero section.** Use: "What will it cost to build your idea?" Subtext: "Fair pricing. Real engineering. No unnecessary upselling."
- 3. Anniversary banner.** Place the three offers — ■2,999+ websites, ■1,999+ student projects, ■999+ mini projects — near the top.
- 4. Use "Starting at" everywhere.** Never display a starting price as if it includes every possible feature.
- 5. Add category cards.** Websites, Mobile Apps, AI & ML, Automation, Student Projects, Design & Engineering.
- 6. Add an estimator.** Ask project type, desired features, approximate budget and a short description. Return an estimated RANGE, not a fixed quote.
- 7. Show assumptions.** Under the estimated range, list what the estimate assumes: pages, integrations, user roles, AI/API usage, revisions, etc.
- 8. Strong CTA.** Use "Get an Exact Quote →" or "Talk to Zenera →". Send the lead to the existing contact/WhatsApp flow.
- 9. Mention exclusions.** Hosting, domains, paid APIs, WhatsApp fees, cloud usage, third-party subscriptions, app-store fees and similar recurring costs are separate unless explicitly included.
- 10. Mobile-first.** The estimator and pricing cards must work cleanly on phones. Avoid huge tables on mobile; use cards/accordions.

■ Recommended Quote Calculator Logic

Do not build a calculator that pretends to know the exact final price. Its job is to qualify the lead and give a sensible ballpark.

Service	Starting	Scope / Positioning
Project type	Base price	Example
Mini Project	■999+	Simple Python/web/ML
Website	■2,999+	Launch website
Student Project	■1,999+	Basic project
AI / ML	■7,999+	Chatbot / ML / CV
Automation	■7,999+	Workflow automation
Mobile App	■24,999+	Basic Flutter app
Custom Web App	■29,999+	Dashboard/SaaS/platform

Suggested flow:

Step A: Select project category.

Step B: Select complexity: Basic / Standard / Advanced.

Step C: Select add-ons: authentication, database, payments, admin panel, AI/API, deployment, etc.

Step D: Calculate a range using the internal base price + complexity/add-on adjustments.

Step E: Display: “Estimated range — ■X–■Y”.

Step F: Ask for contact details and project description to request the final quote.

■■ Team Pricing Rules

- Do not randomly discount below the published starting price without founder/team approval.
- Do not promise a fixed delivery time before scope is understood.
- Do not promise unlimited revisions.
- Do not include recurring third-party costs inside a one-time development price unless explicitly stated.
- For complex projects, move the client from the calculator to a manual quote.
- If a project is unusually complex, quote based on scope rather than forcing it into a package.
- Keep the public page simple. Internal complexity belongs in the quote workflow, not the hero section.

■ Suggested Website Copy

Headline: What will it cost to build your idea?

Subheadline: Tell us what you're building. We'll give you a realistic starting estimate — without selling you features you don't need.

Anniversary line: ■ Zenera Turns 1 — Anniversary starting prices are live.

Trust line: Prices are starting points. Final pricing depends on your actual requirements.

CTA: Get My Estimate →

Secondary CTA: Talk to Zenera →

♥■ FINAL NOTE FOR THE TEAM

Zenera should feel affordable without feeling cheap, and professional without feeling greedy. The anniversary offer is a celebration and customer-acquisition campaign — not a signal that all Zenera work should permanently cost ■2,999. Our advantage is fair pricing + strong engineering + personal attention.
